

Collator Butterer VI70

High speed, accurate
buttering

Constantly
updated real-time
data display

Removable, heated
butter boxes

Allows total
control over
line speed

Stand-alone or
synchronised
integrated
operation

Ensuring the perfect spread

Millitec's Collator Butterer allows the timing of any production run to be fully controlled. The integrated butterers mean that buttered bread is fed at uniform intervals on to the start of the production line. This system can be fully controlled and monitored locally, or from anywhere on your PC network using our production monitoring system. Hygienic design allows tool free, efficient strip down and deep cleaning. Easy to use touch screen to adjust the bread pitch and output speed. Suitable for bread slices and rolls

DIMENSIONS

Width	650mm	Length	2100mm
Belt Height	900mm	Overall Height	1200 mm
Speed	60 slices/min per lane		

IP RATING

Electrical enclosures IP65

ELECTRICAL

Supply	220V AC	Current	6 A
Frequency	50-60 Hz Single Phase	Voltage	24 volts

HEATED HOPPER

Supply	24V DC	Current	4 A
Power	100W		

KEY FEATURES

- Constantly updated real-time data display
- High speed 2,3 or 4 slice modes
- Allows total control over line speed
- Easily dismantled - no special tools required
- Multi-function programmes
- Monitoring/planning system enabling: down load of line production speed, recipe data, batch quality, upload of production history, downtime analysis
- Removable, heated butter boxes
- Can be networked onto production
- Stand-alone or synchronised/integrated

Within our service

- Complete service contract available, typically 6 months full service, maintained by our experienced Service Technicians
- Emergency Call out Facility available
- Purchase spares from our Customer Service Team with ease. Most are shipped same day
- Training packages available to suit your business, carried out at both PDI stage and in situ
- 6 Month Warranty
